

# CONTENT MANAGEMENT DASHBOARD

## YOUR ONLINE CONNECTION TO CONTENT READINESS

### BENEFITS

Real-time, web-based overview of content readiness through content analytics

Insight on content quality in the pipeline

Connects to OGC compliant data sources

The Content Management (CM) Dashboard features a spatially integrated view of content holdings. It is the interface which allows real-time interrogation of the data. As content is consolidated and unified, higher levels of automation become possible and allow users to anticipate future enrichment, enhancement, and maintenance of the content in support of planned and unplanned missions. The suite of automated tools also enables users to identify data gaps as well as assess the content for completeness to meet the specific needs of the customer.

The dashboard ensures greater return on content investments, leads to improved situational awareness, and enables anticipatory management of current and evolving data requirements.

### FOOTPRINTS OF CONTENT AREAS UNDER MAINTENANCE

- Content history over time
- Current state of content
- Future planned maintenance

### CONTENT METRICS

- Continuous monitoring of content change
- Database assessments – qualitative and quantitative down to specific features
- Spatial insights in content gaps and short falls

## REPORTS

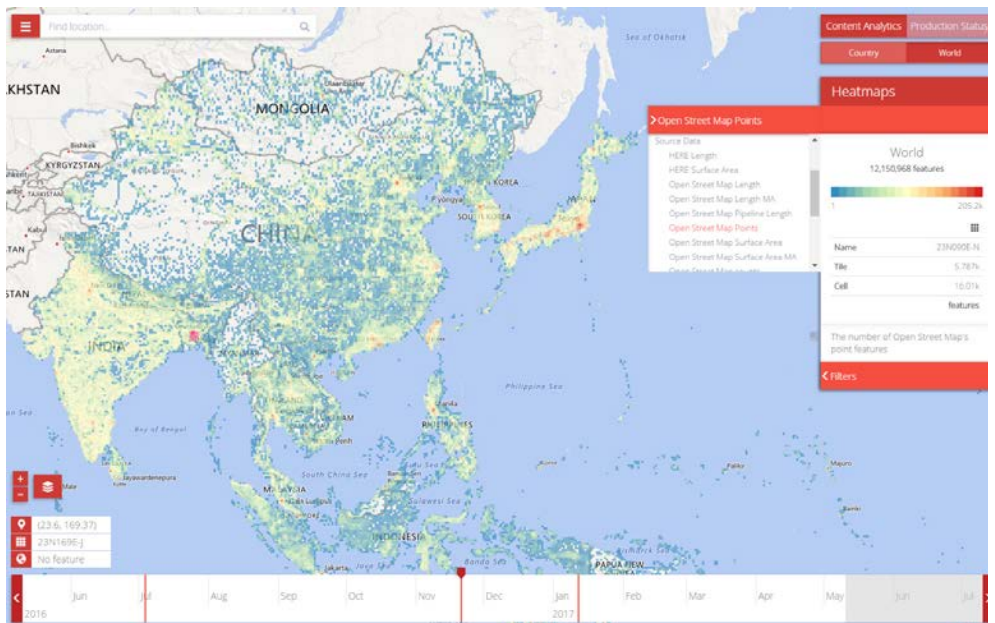

- Available source data
- Qualitative history for active databases
- Country specific or world reports

## REAL-TIME OVERVIEW OF CONTENT READINESS LETS YOU:

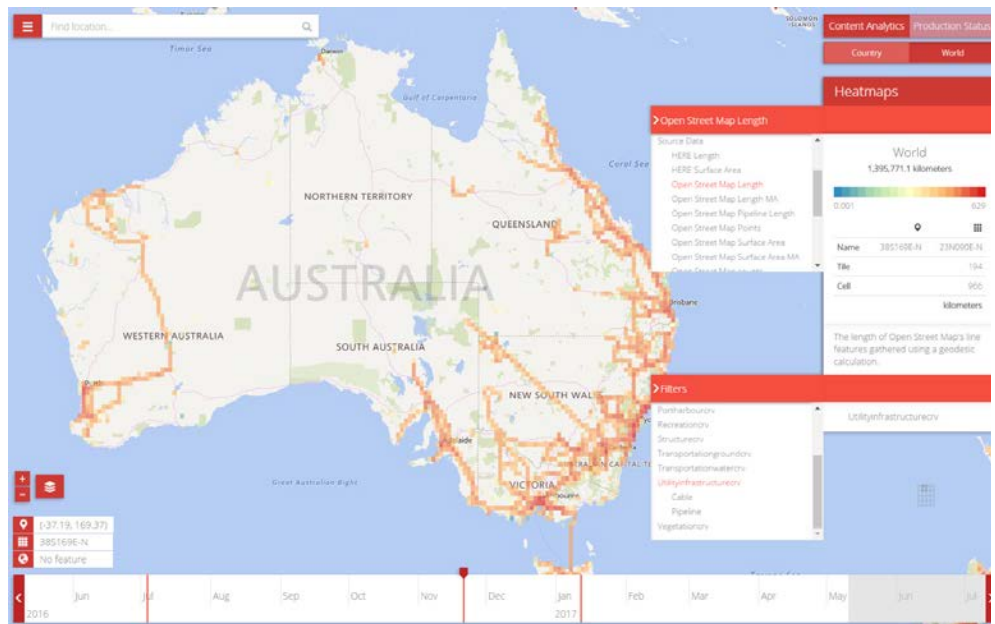

- Identify critical shortfalls in your content to support dynamic operations
- Visualize content to determine if it's available, and if it meets specific mission needs.
- Review content status in real time and pre-emptively analyze for future investments in content

## INSIGHT ON CONTENT QUALITY IN THE PIPELINE PROVIDES:

- Knowledge of content changes, increasing situational awareness in dynamic operations
- A view of the provenance of your archived data, tracking of all historical changes
