CONTENT MANAGEMENT DASHBOARD

YOUR ONLINE CONNECTION TO CONTENT READINESS

The Content Management (CM) Dashboard features a spatially integrated view of content holdings. It is the interface which allows real-time interrogation of the data. As content is consolidated and unified, higher levels of automation become possible and allow users to anticipate future enrichment, enhancement, and maintenance of the content in support of planned and unplanned missions. The suite of automated tools also enables users to identify data gaps as well as assess the content for completeness to meet the specific needs of the customer.

The CM Dashboard features a spatially integrated view of your content holdings as well as high levels of automation when content is consolidated and unified. This leads to improved situational awareness and anticipatory management of current and evolving data requirements.

BENEFITS

- Real-time overview of content Readiness
- Insight on content quality in the pipeline
- Connects to OGC compliant data sources
- Web-based

HARRIS® TECHNOLOGY TO CONNECT, INFORM AND PROTECT™

HIGHLIGHTS & FEATURES
